1. Highlights

Turnover: Strong start into 2025

In the first quarter of 2025, turnover in structured investment and leverage products in note-based format accounted for 46 bn EUR across reporting markets which is an increase of 17% compared with the previous quarter and of 24% against Q1 2024. Leverage products accounted for a turnover of 30 bn EUR in Q1 2025. Their quarterly turnover increased by 24% compared to Q4 2024. Turnover in non-leverage investment products increased by 6% on a quarterly basis.

Outstanding Volume: Steady growth

The Q1 2025 figures for the Austrian, Belgian, German¹, Swiss², Luxembourg and Italian markets indicate a total amount of 471 bn EUR held in note-based structured products, which is a 1% increase compared to the last quarter Q4 2024 and a 7% increase on an annual basis.

Number of new issuances: Strong increase after last year's moderate levels

The overall number of new issuances increased during Q1 2025 when measured against the preceding quarter Q4 2024 (2.246.716 versus 1.922.010 products in Q4 2024). The number of newly issued investment products increased by 10% under a quarterly comparison but decreased by 5% on annual basis. While leverage products continued to have, with 92%, the highest share of new issuances, the number of new listings increased by 18% compared to the preceding quarter Q4 2024 and by even 26% on annual basis.

Total number of products: Continuous increase

Markets of contributing EUSIPA member associations reported 2.691.570 products as open (non-matured) in Q1 2025, which is an increase of 4% compared to the preceding quarter Q4 2024 and of 5% on an annual basis. Leverage products increased number-wise by 4% compared to the previous quarter Q4 2024 and by 7% on an annual basis.

¹ Since June, only the reports of the 15 BSW members have been included in the market shares by market volume.

² The Swiss figures are sourced in from the Swiss National Bank and represent all assets in listed note-based structured retail products held in Swiss depots of issuers domiciled in Switzerland. The figures include therefore, to a small extent, also assets from product sales of these issuers outside Switzerland. The Swiss National Bank has extended the circle of the reportable institutions for the statistics of the securities held in bank's client deposits. The survey group consists now also of institutions with a special field of business. In case of such institutions with a special field of business and especially for deposits which are stored centrally there are only securities included that are not already stored at another reportable bank and reported by it.
